

DATA & AI ENABLEMENT LEADER • OPERATING TRANSFORMATION

Pittsburgh, Pennsylvania 412.287.8640 russelldudek@gmail.com linkedin.com/in/russelldudek russelldudek.github.io/CFS

Operator-technologist who turns fragmented systems and emerging technology into trusted data, clearer workflows, adopted AI-assisted work, and measurable operating outcomes. Brings hands-on experience across ERP, CRM, analytics, telemetry, SQL/Python, AI workflows, quality systems, governance, and cross-functional change.

Data & workflow integration

AI enablement & guardrails

Operating mechanisms

Adoption & value realization

SELECTED LEADERSHIP EXPERIENCE

Vape-Jet • Director of Operations

2025-Present

AI-first operating transformation in software-enabled robotics

- Leads operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works in an environment with approximately 1,000 fielded robots informing service and operating feedback loops.

DudeWorth • Founder / AI and Automation Advisor

2017-Present

AI readiness, workflow design, governance, and adoption

- Develops AI-readiness and opportunity frameworks assessing value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis, and workflow design.

Amazon • Operations Management / Site Leader

2014-2018

Scaled operating visibility, standard work, and customer-backward execution

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms across safety, quality, customer experience, and team engagement.
- Contributed to logistics innovation through Prime Air research and Amazon Flex geolocation concepts.

Compunetics • Director of Operations and Engineering Management

2000-2013

High-reliability engineering, manufacturing, quality, and technical programs

- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls; collaborated with DoD, CERN, Intel, and AMD.
- Published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

Cardinal Building Products • Regional Director

2021-2023

Distributed CRM, commercial, fulfillment, logistics, and digital workflow modernization

- Built the company's first remote regional operation and modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

MANDATE MATCH

Trusted data

Connect sources, definitions

Practical AI

Attach AI to bounded work with explicit

Adoption

Build standard work, training, feedback

Internal ownership

Direct vendors while preserving

DATA & AI ENABLEMENT LEADER · OPERATING TRANSFORMATION

Pittsburgh, Pennsylvania 412.287.8640 russelldudek@gmail.com linkedin.com/in/russelldudek russelldudek.github.io/CFS

COMPLEMENTARY EXPERIENCE

ZeusVu · Chief Pilot, Autonomous Systems and Aerial Data Operations 2018-2022

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and designed medical drone delivery and chain-of-custody concepts.

Enviro Social Capital · Chairman of the Board 2014-2017

- Co-founded a public-private impact initiative and helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh infrastructure improvement.

IEEE · CMPT and EDS Pittsburgh Chapter Chair 2012-2016

- Led regional programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.

ROLE-ALIGNED OPERATING STRENGTHS

- **Shared data meaning:** turns disconnected systems and signals into visible definitions, ownership, quality expectations, and decision routines.
- **AI inside work:** frames AI around business value, human authority, governance, workflow insertion, adoption, and measurable outcomes.
- **Builder-translator:** works across operators, executives, vendors, engineers, quality, customer teams, and technical specialists.
- **High-consequence discipline:** applies Lean, Gemba, Six Sigma, safety, quality, root cause, escalation, and process-control thinking.

TECHNICAL TOOLKIT

Agentic AI · LLM workflows · RAG patterns · Human-in-the-loop design · Python · SQL · JavaScript · TensorFlow · Tableau · ERP/Odoo workflows · Jira · Confluence · HubSpot · Slack · GIS and mapping workflows

EDUCATION & CREDENTIALS

University of Pittsburgh · Bachelor of Science

Google AI Essentials

IBM Enterprise Design Thinking Practitioner · Six Sigma Certification · OSHA 10

FIT BOUNDARY

Russell does not claim a career enterprise data architect title or unsupported production Fabric ownership. His differentiated value is owning the business architecture, data meaning, workflow priorities, human authority, governance, adoption, vendor boundaries, and realized operating outcomes that make a modern data platform useful.

CANDIDATE VISION

russelldudek.github.io/CFS - Shared Operating Lens, interview thesis, first 120 days, and working review canvas.

OPERATING MECHANISMS I BUILD

Decision / workflow charter Outcome, owner, baseline, consequence	Data meaning record Source, definition, quality, lineage, steward	Authority contract AI role, human decision, review, escalation
Adoption loop Standard work, training, support, feedback	Vendor decision record Build/buy/connect boundary and knowledge transfer	Balanced scorecard Trust, use, flow, value, control, learning

LEADERSHIP THROUGH-LINE

Makes complex work visible, connects technical and business teams, creates operating mechanisms, and turns emerging technology into adopted, measurable outcomes - without overstating title, scope, or deployment evidence.
